

Recycle?

Cristian Ochoa

Grade: 3

1st Place - Grades 3rd to 5th

Southgate Elementary School

You should always recycle. You should follow the four R's "Reduce, Reuse, Recycle, Rot." If we recycle we can build parks and stores. If we recycle we would have a better future. The more we use buses, cars or trains we pollute the air. We can change the world if we recycle. If we recycle we are helping animal habitats, their community and their food, but most of all the animals. In Denver they made a special kind of gas. If we all think of ways to make changes and recycle our earth would be a better place to live. When we recycle it goes into a factory and is made into a new product. Everyone can recycle, adults or children by teaching others to recycle too. This way we show we care about our community and future. There are other ways to help, by picking up garbage from streets, buying stuff that is made of recycled items or recycle papers. We can help clean our ocean by not littering or throwing things in the gutters. We could even recycle our grass or leaves to make food for our plants. Worms help us make trash into dirt and that also helps our earth.
